

Music FunTime is a Structured Curriculum

In our small group classes, we work one on one with all students to **maximize individual student's learning capabilities.**

Your child will **explore music, dance, singing, and more.** Your child will learn to **share, take turns, and develop skills they'll need in school and on the neighborhood playground.**

Our Music FunTime classes bring you **closer together as a family.** They are fun, yet educational, and an important part of your child's development.

Benefits of Music FunTime

Popular reports out of Congress and studies at **Johns-Hopkins Research Center** continue to suggest that especially for young children there is a **magical connection between Math and Music.** Music FunTime's curriculum is based upon this research: by teaching music to children ages 2-7 years through rhythm, pitch, theory and technique.

SUMMERTIME!

Small Group Music Lessons
for Ages 2-7 at

This innovative program uses an array of colorful musical tools that teach rhythm, pitch, notation, and symbols while stimulating a child's right and left brain!
